Alex Chen

Pittsburgh, PA | +1 555-010-0199 | alex.chen.example@gmail.com | linkedin.com/in/alex-chen-example | github.com/alex-chen-example

EDUCATION

Carnegie Mellon University Pittsburgh, PA
M.S. in Computer Science; GPA 3.9/4.0 Aug 2025 – Expected May 2027
Coursework: Deep Learning Systems, Distributed Systems, Machine Learning

Zhejiang University Hangzhou, China
B.Eng. in Computer Science; GPA 3.8/4.0 Sep 2021 – Jun 2025

EXPERIENCE

Machine Learning Engineer Intern, Example AI Labs Jun 2024 – Sep 2024
Beijing, China

- Cut LLM inference latency by 35% by adding continuous batching and paged KV-cache to an internal serving stack (PyTorch, CUDA).
- Built an evaluation harness that ran 12 benchmark suites nightly and caught 3 regressions before release.
- Wrote a Triton kernel for fused RMSNorm, giving a 1.8x speedup over the PyTorch baseline.

Teaching Assistant, Data Structures, Zhejiang University Sep 2023 – Jan 2024
Hangzhou, China

- Led weekly labs for 60 students and wrote autograded C++ assignments.

PROJECTS

Research Agent | Python, Claude API, Playwright github.com/alex-chen-example/research-agent

- Built a tool-using research agent that plans sub-questions, searches the web and writes cited reports.
- Designed an offline test harness with a scripted fake client covering every branch of the agent loop.

Speculative Decoding Study | PyTorch, vLLM

- Benchmarked speculative decoding on 3 model pairs and reached 2.1x throughput at matched quality.

SKILLS

Languages: Python, C++, CUDA, SQL, Go
ML & Systems: PyTorch, Triton, vLLM, Ray, Docker, Kubernetes
Tools: Git, Linux, Playwright, FastAPI
